

# Advantages

- \* Speed up dev time
- \* Reduce cost of dev
- \* handle the logic required to interact with db
- \* Only need to focus on business logic
- \* Improve security

improve security  
SQL injection  
prevent

\* you have to  
write less code

disadvantages

\* learning how to  
use ORM can be  
time consuming

\* ORM is generally  
slower than

using SQL

\* They are not  
going to perform  
better when  
very complex  
queries are involved
